

SCAFFOLD TRANSPORT PALLET

Handling is one of the biggest costs in scaffold rental. Now you can slash countless hours loading, unloading and reloading with a Star Industries scaffold transport pallet. Plus, you have the perfect compact storage unit for difficult-to-stack scaffold that you can easily reposition with a forklift when scaffold is in the rental yard waiting for the next job.

- ➔ Load scaffold into the pallet once at rental yard & deliver the loaded pallet to the job site.
- ➔ The contractor unloads the scaffold at the job site and when the job is done, repacks the scaffold pallet.
- ➔ You pick up the loaded pallet, ready to ship to the next job.

FEATURES

- ➔ Model 930 holds 50 frames (6'6" x 5'0") and 100 braces (7')
- ➔ Features fork loops for proper fork placement when loading pallet onto a truck with a forklift
- ➔ Two anchor points for securing scaffold with strap for transportation
- ➔ Expanded metal deck for sure footing
- ➔ Empty weight 755 lbs
- ➔ Requires 48" or longer forks and 48" or wider carriage
- ➔ Picked up from brace side
- ➔ Brace basket and scaffold pins removeable for shipping
